communications

## Subject Index of Volume 33

**k-Anonymity**

Preserving privacy in participatory sensing systems 1266

**k-Core decomposition**Characterizing and modeling the Internet Router-level topology  
– The hierarchical features and HIR model 2001**k-Diversity**

Preserving privacy in participatory sensing systems 1266

**3G**A review of DoS attack models for 3G cellular networks from a  
system-design perspective 551**60 GHz radio**Solving the uncertainty of vertical handovers in multi-radio  
home networks 1122**802.11**Achieving maximal VoIP calls in 802.11 wireless  
networks 1296Enabling faster and smoother handoffs in AP-dense 802.11  
wireless networks 1795Two-way Handshake protocol for improved security in IEEE  
802.11 wireless LANs 1133**802.15.3**Achieving maximal VoIP calls in 802.11 wireless  
networks 1296**802.16**Design of the multicast service for mobile users in the 802.16  
network environment 1030**Accounting**Compensation: Architecture for supporting dynamicity and  
negotiation in accounting, charging and billing 1823**Accumulated information**Measuring long-term location privacy in vehicular  
communication systems 1414**Active**Privacy versus scalability in radio frequency identification  
systems 2155**Active measurement**Task-execution scheduling schemes for network measurement  
and monitoring 124**Active network measurement**On the applicability of available bandwidth estimation  
techniques and tools 11**Active queue management**

Implementation of MPC as an AQM controller 227

**Ad hoc wireless network**A non-cooperative game approach for power-aware MAC in ad  
hoc wireless networks 1440**Address configuration**The room shortage problem of tree-based ZigBee/IEEE 802.15.4  
wireless networks 454**Admission control**Joint admission and rate control for multimedia sharing in  
wireless home networks 1632**Aerial platforms**Use of aerial platforms for energy efficient medium access  
control in wireless sensor networks 500**Agent-based intrusion detection**Military tactics in agent-based sinkhole attack detection for  
wireless ad hoc networks 619**Aggregated interference**From cognition to cognition: The teaching radio paradigm for  
distributed & autonomous deployments 2015**Aggregation protocols**Distributed estimation of global parameters in delay-tolerant  
networks 1472**Alamouti SFBC**On the performance evaluation of an LTE SFBC system with  
Wiener channel estimation in frequency-selective  
channels 2031**All-length Bloom filter**Hierarchical packet classification using a Bloom filter and rule-  
priority tries 1215**All-to-all broadcast**Wavelength assignment for all-to-all broadcast in WDM optical  
linear array with limited drops 1804**All-to-all broadcast (AAB)**Improvement of multi-hop packet transmission scheduling in  
WDM optical star networks 706**Analytical modelling**HCM: Modelling spatial and temporal properties of human  
mobility driven by users' social relationships 1056**Analytical models**An efficient analytical model for the dimensioning of WiMAX  
networks supporting multi-profile best effort traffic 1162**Anomaly score**

An efficient network intrusion detection 477

**Anonymity**

Preserving privacy in participatory sensing systems 1266

**Anycast**

SCTP for robust and flexible IP anycast services 365

**Approximate location queries**ALM: An adaptive location management scheme for  
approximate location queries in wireless sensor  
networks 1937**Approximation algorithm**Interference and power constrained broadcast and multicast  
routing in wireless ad hoc networks using directional  
antennas 1428**Architecture**Towards cross layer mobility support in metropolitan  
networks 202**Assignment game**Distributed relay selection over multi-source and multi-relay  
wireless cooperative networks with selfish nodes 2145**Audio coding**

Media coding for the next generation mobile system LTE 1916

**Authentication**

- Fast certificate-based authentication scheme in multi-operator maintained wireless mesh networks 907
- Two-way Handshake protocol for improved security in IEEE 802.11 wireless LANs 1133

**Autonomic resource management**

- A collusion-resistant mechanism for autonomic resource management in Virtual Private Networks 2070

**Available bandwidth estimation**

- On the applicability of available bandwidth estimation techniques and tools 11

**Backbone**

- Passive internet measurement: Overview and guidelines based on experiences 533

**Backpressured networks**

- Improving performance of backpressured packet networks by integrating with an end-to-end congestion control algorithm 43

**Bandwidth allocation**

- Bandwidth allocation with a particle swarm meta-heuristic for ethernet passive optical networks 526

**Bandwidth estimation**

- TCP-friendly congestion control for the fair streaming of scalable video 1578

**Bayesian network**

- Context-aware end-to-end QoS qualitative diagnosis and quantitative guarantee based on Bayesian network 2132

**Best matching rule**

- Hierarchical packet classification using a Bloom filter and rule-priority tries 1215

**Best practices**

- Trust management systems for wireless sensor networks: Best practices 1086

**Bilinear pairings**

- Privacy and confidentiality in context-based and epidemic forwarding 1493

**Billing**

- Compensation: Architecture for supporting dynamicity and negotiation in accounting, charging and billing 1823

**Birkhoff-von Neumann**

- Birkhoff-von Neumann switching with statistical traffic profiles 848

**Bit-split**

- Accelerating the bit-split string matching algorithm using Bloom filters 1785

**BitTorrent**

- A BitTorrent proxy for Green Internet file sharing: Design and experimental evaluation 794

**Block-Markov encoding**

- Block-Markov encoding with network coding for cooperative communications 2021

**Bloom filter**

- Accelerating the bit-split string matching algorithm using Bloom filters 1785
- Denial of service attack-resistant flooding authentication in wireless sensor networks 1531

**Borel Cayley graph**

- A graph theoretic approach to ultrafast information distribution: Borel Cayley graph resizing algorithm 2093

**Botnet**

- Creation of the importance scanning worm using information collected by Botnets 676

**Broadband wireless access**

- IEEE 802.16: History, status and future trends 113

**Broadcast**

- Adjustable convergencast tree protocol for wireless sensor networks 559

**Broadcast authentication**

- Denial of service attack-resistant flooding authentication in wireless sensor networks 1531

**Broadcast/multicast**

- Interference and power constrained broadcast and multicast routing in wireless ad hoc networks using directional antennas 1428

**Buffer management**

- Trading link utilization for queueing delays: An adaptive approach 1108

**Buffer wall phenomenon**

- Level the buffer wall: Fair channel assignment in wireless sensor networks 1370

**Byte filter**

- Accelerating the bit-split string matching algorithm using Bloom filters 1785

**C4.5**

- Hierarchical distributed data classification in wireless sensor networks 1404

**CAC**

- Dynamic guard margin CAC algorithm with ensured QoS and low CDP in heterogeneous wireless networks 1645

**Cache placement and replacement strategies**

- Analysis and performance study for coordinated hierarchical cache placement strategies 1834

**Caching**

- Expediating IP lookups with reduced power via TBM and SST supernode caching 390

**Callback**

- A callback mechanism for Private Telecommunications Networks 583

**Capacity planning**

- Robust network dimensioning for realtime services over IP networks with traffic deviation 976

**Cayley graph**

- A graph theoretic approach to ultrafast information distribution: Borel Cayley graph resizing algorithm 2093

**CBQ**

- Admission region of triple-play services in wireless home networks 852

**Cellular networks**

- A review of DoS attack models for 3G cellular networks from a system-design perspective 551
- QoS analysis of video streaming service in live cellular networks 322

**Cellular radio systems**

- Decentralized power control in cellular mobile radio systems with nonlinear and time-varying link gains 1210

**Cellular-WLAN Integration**

- Multi home agent and pointer-based (MHA-PB) location management scheme in integrated cellular-WLAN networks for frequent moving users 2260

**Channel assignment**

- A distributed channel assignment protocol for rate separation in wireless mesh networks 1281

**Channel estimation**

- SAGE based joint timing-frequency offsets and channel estimation in distributed MIMO systems 2125

**Charging**

- Compensation: Architecture for supporting dynamicity and negotiation in accounting, charging and billing 1823

**Classification**

- Hierarchical distributed data classification in wireless sensor networks 1404

**Clique**

- Task-execution scheduling schemes for network measurement and monitoring 124

**Clos network**

Multicast three-stage Clos networks 923

**Cluster-based**

Research on the energy hole problem based on unequal cluster-radius for wireless sensor networks 302

**Clustering**

A novel stable selection and reliable transmission protocol for clustered heterogeneous wireless sensor networks 1843  
ECGK: An efficient clustering scheme for group key management in MANETs 1094

**CMAC neural network model**

A hybrid QoS multicast framework-based protocol for wireless mesh networks 2079

**CMT**

Throughput analysis of Non-Renegable Selective Acknowledgments (NR-SACKs) for SCTP 1982

**Cognitive radio**

From cognition to doction: The teaching radio paradigm for distributed & autonomous deployments 2015

**Collision resolution**

Optimal frame size analysis for framed slotted ALOHA based RFID networks 648

**Combinatorial optimization**

Deploying multiple interconnected gateways in heterogeneous wireless sensor networks: An optimization approach 1151

**Communication anonymity**

Survey on anonymous communications in computer networks 420

**Communication gray zone**

A cross-layer stability-based routing mechanism for ultra wideband networks 2185

**Communication system traffic**

Characterization of long-range dependent traffic regulated by leaky-bucket policers and shapers 714

**Compensation**

Compensation: Architecture for supporting dynamicity and negotiation in accounting, charging and billing 1823

**Complex network**

Characterizing and modeling the Internet Router-level topology – The hierarchical features and HIR model 2001

**Compromised node**

A multi-path interleaved hop-by-hop en-route filtering scheme in wireless sensor networks 1202

**Confidentiality**

Privacy and confidentiality in context-based and epidemic forwarding 1493

**Congestion awareness**

A novel SIP based procedure for congestion aware handover in heterogeneous networks 2176

**Congestion control**

CODE TCP: A competitive delay-based TCP 1013  
Generalized stochastic performance models for loss-based congestion control 513  
Improving performance of backpressured packet networks by integrating with an end-to-end congestion control algorithm 43  
TCP-friendly congestion control for the fair streaming of scalable video 1578

**Congestion control (CC)**

A bio-inspired approach for streaming applications in wireless sensor networks based on the Lotka–Volterra competition model 2039

**Connectivity**

Application-level assessment of approaches to coordinate node mobility in wireless sensor and actor networks 860

**Contactless card**

Attacks on a distance bounding protocol 884

**Content networks**

A cost-effective resource allocation and management scheme for content networks supporting IPTV services 83

**Content-based partitioning**

Identify P2P traffic by inspecting data transfer behavior 1141

**Contention avoidance**

Using updated neighbor state information for efficient contention avoidance in OBS networks 65

**Context**

Context-aware end-to-end QoS qualitative diagnosis and quantitative guarantee based on Bayesian network 2132

**Context discretization**

Context-aware end-to-end QoS qualitative diagnosis and quantitative guarantee based on Bayesian network 2132

**Context-based forwarding**

Privacy and confidentiality in context-based and epidemic forwarding 1493

**Convergecast**

Adjustable convergecast tree protocol for wireless sensor networks 559

**Converged VoIP network**

A secure and efficient SIP authentication scheme for converged VoIP networks 1674

**Convergence**

Analysis of efficient and fair explicit congestion control protocol with feedback delay: Stability and convergence 1992

**Convex optimization**

Utility-proportional bandwidth sharing for multimedia transmission supporting scalable video coding 1543

**Cooperative caching system**

Analysis and performance study for coordinated hierarchical cache placement strategies 1834

**Cooperative communications**

Block-Markov encoding with network coding for cooperative communications 2021

**Cooperative diversity protocols**

Distributed relay selection over multi-source and multi-relay wireless cooperative networks with selfish nodes 2145

**Coordination**

Application-level assessment of approaches to coordinate node mobility in wireless sensor and actor networks 860

**Core**

Distributed relay selection over multi-source and multi-relay wireless cooperative networks with selfish nodes 2145

**Cost-bandwidth trade-off**

Cost-bandwidth tradeoff in distributed storage systems 2105

**Cover**

Random walk with jumps in large-scale random geometric graphs 1505

**Crankback signaling**

Enhanced crankback signaling for multi-domain IP/MPLS networks 2215

**CRB**

SAGE based joint timing-frequency offsets and channel estimation in distributed MIMO systems 2125

**Credit**

OverCourt: DDoS mitigation through credit-based traffic segregation and path migration 2164

**Cross-layer**

A cross-layer stability-based routing mechanism for ultra wideband networks 2185

Media independent handover transport using cross-layer optimized stream control transmission protocol 1075

**Cross-layer adaptation**

QoE-driven dynamic management proposals for 3G VoIP services 1707

**Cross-layer architecture**

Asymptotic delay analysis and timeout-based admission control for ad hoc wireless networks with asymmetric users 2057

**Cross-layer design**

A distortion-minimizing rate controller for wireless multimedia sensor networks 1380  
 Cross-layer wireless video adaptation: Tradeoff between distortion and delay 1615  
 QoE oriented cross-layer design of a resource allocation algorithm in beyond 3G systems 571

**Cryptanalysis**

A secure and efficient SIP authentication scheme for converged VoIP networks 1674

**Cryptography**

A secure and efficient SIP authentication scheme for converged VoIP networks 1674  
 An efficient fault-tolerant group key agreement protocol 890  
 Simple and efficient hash-based verifiable mixing for remote electronic voting 667

**CSMA networks**

A forcing collision resolution approach able to prioritize traffic in CSMA-based networks 54

**CT**

Multiple path selection algorithm for DiffServ-aware MPLS traffic engineering 1557

**Data aggregation**

Time-slotted voting mechanism for fusion data assurance in wireless sensor networks under stealthy attacks 1524

**Data fusion**

Time-slotted voting mechanism for fusion data assurance in wireless sensor networks under stealthy attacks 1524

**Data gathering protocols**

Efficient path planning and data gathering protocols for the wireless sensor network 398

**Data rate**

Achieving optimal data storage position in wireless sensor networks 92

**Data reporting**

QoS-aware data reporting control in cluster-based wireless sensor networks 1244

**Data transfer behavior**

Identify P2P traffic by inspecting data transfer behavior 1141

**DDoS defense**

OverCourt: DDoS mitigation through credit-based traffic segregation and path migration 2164

**Decentralized control**

Decentralized power control in cellular mobile radio systems with nonlinear and time-varying link gains 1210

**Decentralized Q-learning**

From cognition to doctition: The teaching radio paradigm for distributed & autonomous deployments 2015

**Decision theory**

Solving the uncertainty of vertical handovers in multi-radio home networks 1122

**Decision tree**

A fast IPv6 packet classification algorithm based on efficient multi-bit selection 1773  
 Hierarchical distributed data classification in wireless sensor networks 1404

**Delay**

Cross-layer wireless video adaptation: Tradeoff between distortion and delay 1615

**Delay allocation**

Novel dynamic delay allocation adjustment for improving bandwidth efficiency 463

**Delay analysis**

Fairness maximization and delay analysis for multi-antenna broadcast channels using random beamforming 2116

**Delay tolerant networks**

HYMAD: Hybrid DTN-MANET routing for dense and highly dynamic wireless networks 1483  
 TrainNet: A transport system for delivering non real-time data 1850

**Delay-tolerant networks**

Controlling resource hogs in mobile delay-tolerant networks 2  
 Distributed estimation of global parameters in delay-tolerant networks 1472

**Delay/utilization tradeoff**

Trading link utilization for queueing delays: An adaptive approach 1108

**Descendent tracking**

Key-update distribution in secure group communication 689

**Design optimization**

A memetic algorithm for optimal dynamic design of wireless sensor networks 250

**Deterministic hybrid model**

Convergence of trajectories and optimal buffer sizing for MIMD congestion control 149

**Differentiated services**

Providing forwarding assurance in multi-hop wireless networks 293

**DiffServ-TE**

Multiple path selection algorithm for DiffServ-aware MPLS traffic engineering 1557

**Digital fingerprinting**

Secure and traceable multimedia distribution for convergent Mobile TV services 1664

**Digital rights management**

Secure and traceable multimedia distribution for convergent Mobile TV services 1664

**Dimensioning**

An efficient analytical model for the dimensioning of WiMAX networks supporting multi-profile best effort traffic 1162

**Disconnection prediction**

A hybrid QoS multicast framework-based protocol for wireless mesh networks 2079

**Discrete autoregressive model**

Modeling multiplexed traffic from H.264/AVC videoconference streams 1235

**Discrete-time queueing model**

Discrete-time modeling for performance analysis of real-time services in IEEE 802.16 networks 1928

**Dispersity routing**

A resequencing model for high-speed packet-switching networks 443

**Distance bounding protocol**

Attacks on a distance bounding protocol 884

**Distortion**

Cross-layer wireless video adaptation: Tradeoff between distortion and delay 1615

**Distributed computation**

Distributed estimation of global parameters in delay-tolerant networks 1472

**Distributed data structures**

Skiptree: A new scalable distributed data structure on multidimensional data supporting range-queries 73

**Distributed estimation**

Distributed estimation of global parameters in delay-tolerant networks 1472

**Distributed Hash Tables**

Replica-aware, multi-dimensional range queries in Distributed Hash Tables 984

**Distributed learning automata**

Mobility-based multicast routing algorithm for wireless mobile Ad-hoc networks: A learning automata approach 721

**Distributed localization**

Distributed wireless sensor network localization using stochastic proximity embedding 745

**Distributed schemes**

A fully distributed node allocation scheme with partition protection for Mobile Ad Hoc Networks 1949

**Distributed storage systems**

Cost-bandwidth tradeoff in distributed storage systems 2105

**Distributed systems**

Network-assisted sink navigation for distributed data gathering: Stability and delay-energy trade-offs 160

**Distributed ubiquitous systems**

Networking in E-textiles 655

**Diversity-multiplexing tradeoff**

Block-Markov encoding with network coding for cooperative communications 2021

**Docitive learning**

From cognition to docition: The teaching radio paradigm for distributed & autonomous deployments 2015

**DoS**

A review of DoS attack models for 3G cellular networks from a system-design perspective 551

**Dual Home Agent (DHA)**

Multi home agent and pointer-based (MHA-PB) location management scheme in integrated cellular-WLAN networks for frequent moving users 2260

**Duty cycle**

An energy-efficient and low-latency MAC protocol with Adaptive Scheduling for multi-hop wireless sensor networks 1452

**Dynamic adversarial attacks**

The impact of dynamic adversarial attacks on the stability of heterogeneous multimedia networks 1695

**Dynamic programming**

Efficient algorithms to solve Broadcast Scheduling problem in WiMAX mesh networks 1325

**Dynamic timer adjustment**

Dynamic Hello/Timeout timer adjustment in routing protocols for reducing overhead in MANETs 1864

**Dynamicity**

Compensation: Architecture for supporting dynamicity and negotiation in accounting, charging and billing 1823

**E-model**

QoE-driven dynamic management proposals for 3G VoIP services 1707

**E-textiles**

Networking in E-textiles 655

**EAP**

Fast certificate-based authentication scheme in multi-operator maintained wireless mesh networks 907  
Privacy-enhanced fast re-authentication for EAP-based next generation network 1682

**Eavesdrop**

Enabling faster and smoother handoffs in AP-dense 802.11 wireless networks 1795

**Efficiency**

An efficient fault-tolerant group key agreement protocol 890

**Electronic voting**

Simple and efficient hash-based verifiable mixing for remote electronic voting 667

**En-route filtering scheme**

A multi-path interleaved hop-by-hop en-route filtering scheme in wireless sensor networks 1202

**End-to-end availability**

Spare capacity provisioning for high availability shared backup path protection connections 603

**End-to-end delay guarantee**

Novel dynamic delay allocation adjustment for improving bandwidth efficiency 463

**Energy aware planning**

Deploying multiple interconnected gateways in heterogeneous wireless sensor networks: An optimization approach 1151

**Energy conservation**

A memetic algorithm for optimal dynamic design of wireless sensor networks 250

**Energy consumption**

A global profile-based algorithm for energy minimization in object tracking sensor networks 736

**Energy efficiency**

A BitTorrent proxy for Green Internet file sharing: Design and experimental evaluation 794

A novel stable selection and reliable transmission protocol for clustered heterogeneous wireless sensor networks 1843

An energy-efficient and low-latency MAC protocol with Adaptive Scheduling for multi-hop wireless sensor networks 1452

**Improving network lifetime with mobile wireless sensor networks 409**

Use of aerial platforms for energy efficient medium access control in wireless sensor networks 500

**Energy hole problem**

Research on the energy hole problem based on unequal cluster-radius for wireless sensor networks 302

**Energy saving**

An energy-efficient data gathering algorithm to prolong lifetime of wireless sensor networks 639

**Energy-efficient**

Interference and power constrained broadcast and multicast routing in wireless ad hoc networks using directional antennas 1428

**Engineering**

Effective load for flow-level performance modelling of file transfers in wireless LANs 1972

**Entropy**

Measuring long-term location privacy in vehicular communication systems 1414

**EPON**

User-oriented hierarchical bandwidth scheduling for ethernet passive optical networks 965

**ertPS**

Performance evaluation of a new QoS packet-scheduler for VoIP service in IEEE 802.16-based WMAN systems 589

**Ethernet Passive Optical Network**

Bandwidth allocation with a particle swarm meta-heuristic for ethernet passive optical networks 526

**EUTRA**

LTE, the radio technology path towards 4G 1894

**Experimental prototype**

Implementation frameworks for IEEE 802.11s systems 336

**Exploit code**

An efficient network intrusion detection 477

**Extended networks**

Improved asymptotic multicast throughput for random extended networks 2195

**Face routing**

Minimizing recovery overhead in geographic ad hoc routing 1343

**Factorial design**

On the applicability of available bandwidth estimation techniques and tools 11

**Failure**

Analytical characterization of failure recovery in REAP 485

**Fairness**

CODE TCP: A competitive delay-based TCP 1013

Fairness provisioning in multi-hop wireless backhaul networks: Challenges and solutions 1767

Level the buffer wall: Fair channel assignment in wireless sensor networks 1370

**Fast re-authentication**

Privacy-enhanced fast re-authentication for EAP-based next generation network 1682

**Fault-tolerance**

An efficient fault-tolerant group key agreement protocol 890

Networking in E-textiles 655

**Fiber delay lines**

On modeling optical burst switching networks with fiber delay lines: A novel approach 240

**Finite buffer analysis**

Network queue and loss analysis using histogram-based traffic models 190

**Fixed wireless networks**

Power-efficient radio configuration in fixed broadband wireless networks 898

**Flow statistics**

On the statistical characterization of flows in Internet traffic with application to sampling 103

**Flow-level performance**

Effective load for flow-level performance modelling of file transfers in wireless LANs 1972

**Fluid model**

Admission region of triple-play services in wireless home networks 852

**FPGA timing analysis**

Implementation of MPC as an AQM controller 227

**Free riding**

A secure model for controlling the hubs in P2P wireless network based on trust value 997

**Frequency offset estimation**

SAGE based joint timing-frequency offsets and channel estimation in distributed MIMO systems 2125

**Fuzzy logic**

Fuzzy logic based layers 2 and 3 handovers in IEEE 802.16e network 2224

**G/G/1 queue**

Asymptotic delay analysis and timeout-based admission control for ad hoc wireless networks with asymmetric users 2057

**Game theory**

A collusion-resistant mechanism for autonomic resource management in Virtual Private Networks 2070

A hybrid game model based on reputation for spectrum allocation in wireless networks 1623

A non-cooperative game approach for power-aware MAC in ad hoc wireless networks 1440

**Gateway balancing**

A hybrid QoS multicast framework-based protocol for wireless mesh networks 2079

**Gateway placement**

Deploying multiple interconnected gateways in heterogeneous wireless sensor networks: An optimization approach 1151

**Generalized multi-protocol label switching (GMPLS)**

Spare capacity reprovisioning for high availability shared backup path protection connections 603

**Generalized physical model**

Improved asymptotic multicast throughput for random extended networks 2195

**Generic graph model**

Placement of wavelength converters and light splitters in a WDM network using the generic graph model 868

**Genetic algorithm**

Efficient algorithms to solve Broadcast Scheduling problem in WiMAX mesh networks 1325

**Geographic routing**

Minimizing recovery overhead in geographic ad hoc routing 1343

**Virtual position based geographic routing for wireless sensor networks 1255****Geographical location**

Achieving optimal data storage position in wireless sensor networks 92

**Graph coloring**

Task-execution scheduling schemes for network measurement and monitoring 124

**Graph theory**

A graph theoretic approach to ultrafast information distribution: Borel Cayley graph resizing algorithm 2093

**GRASP meta-heuristic**

A GRASP-based network re-optimization strategy for improving RWA in multi-constrained optical transport infrastructures 1809

**Greedy forwarding**

Virtual position based geographic routing for wireless sensor networks 1255

**Greedy routing extension**

Minimizing recovery overhead in geographic ad hoc routing 1343

**Green Internet**

A BitTorrent proxy for Green Internet file sharing: Design and experimental evaluation 794

**Grids**

A prototype and demonstrator of Akogrimo's architecture: An approach of merging grids, SOA, and the mobile Internet 1304

**Grooming**

A GRASP-based network re-optimization strategy for improving RWA in multi-constrained optical transport infrastructures 1809

**Group key agreement**

An efficient fault-tolerant group key agreement protocol 890

**Group key management**

Computation-and-storage-efficient key tree management protocol for secure multicast communications 136  
ECCK: An efficient clustering scheme for group key management in MANETs 1094

**Guidelines**

Passive internet measurement: Overview and guidelines based on experiences 533

**H.264/AVC video**

Modeling multiplexed traffic from H.264/AVC videoconference streams 1235

**Handoff**

Enabling faster and smoother handoffs in AP-dense 802.11 wireless networks 1795

**Handover**

Two-way Handshake protocol for improved security in IEEE 802.11 wireless LANs 1133

**Handovers**

LTE key management analysis with session keys context 1907

**Handshake protocol**

Two-way Handshake protocol for improved security in IEEE 802.11 wireless LANs 1133

**Hashing**

Hierarchical packet classification using a Bloom filter and rule-priority tries 1215

**Heavy-tailed distribution**

Nearly optimal power saving policies for mobile stations in wireless networks 595

**Heavy-tails**

A critical look at power law modelling of the Internet 259

**Heterogeneity**

A novel stable selection and reliable transmission protocol for clustered heterogeneous wireless sensor networks 1843

**Heterogeneous multimedia networks**

The impact of dynamic adversarial attacks on the stability of heterogeneous multimedia networks 1695

**Heterogeneous network**

Dynamic guard margin CAC algorithm with ensured QoS and low CDP in heterogeneous wireless networks 1645  
Solving the uncertainty of vertical handovers in multi-radio home networks 1122

**Heterogeneous networks**

A novel SIP based procedure for congestion aware handover in heterogeneous networks 2176  
Environment-aware QoS framework for multi-interface terminal 1049

**Heterogeneous sensor networks**

Deploying multiple interconnected gateways in heterogeneous wireless sensor networks: An optimization approach 1151

**Heterogeneous wireless networks**

Vehicular telematics over heterogeneous wireless networks: A survey 775

**Hierarchy**

Characterizing and modeling the Internet Router-level topology – The hierarchical features and HIR model 2001

**High-performance switches**

Birkhoff-von Neumann switching with statistical traffic profiles 848

**High-speed networks**

Analysis of efficient and fair explicit congestion control protocol with feedback delay: Stability and convergence 1992

**Home network**

Joint admission and rate control for multimedia sharing in wireless home networks 1632

**HTTP session mobility**

A SIP-based web client for HTTP session mobility and multimedia services 954

**HTTP subjective quality survey**

QoE oriented cross-layer design of a resource allocation algorithm in beyond 3G systems 571

**Hybrid**

Towards cross layer mobility support in metropolitan networks 202

**Hybrid pull-push protocol**

An adaptive rendezvous data dissemination for irregular sensor networks with multiple sinks 176

**Hybrid wired-wireless networks**

Improving performance of backpressured packet networks by integrating with an end-to-end congestion control algorithm 43

**Hybrid wireless mesh protocol (HWMP)**

Implementation frameworks for IEEE 802.11s systems 336

**iBGP**

BGP route prediction within ISPs 1180

**Identifier assignment**

Key-update distribution in secure group communication 689

**IEEE 802.11 protocol**

A forcing collision resolution approach able to prioritize traffic in CSMA-based networks 54

**IEEE 802.11n WLAN**

VPAL: Video Packet Adaptation Layer for reliable video multicast over IEEE 802.11n WLAN 2271

**IEEE 802.11s**

Implementation frameworks for IEEE 802.11s systems 336

**IEEE 802.16**

Mini-slot scheduling for IEEE 802.16d chain and grid mesh networks 2048

Performance evaluation of a new QoS packet-scheduler for VoIP service in IEEE 802.16-based WMAN systems 589

**IEEE 802.16 networks**

Efficient algorithms to solve Broadcast Scheduling problem in WiMAX mesh networks 1325

**IEEE 802.16e**

Fuzzy logic based layers 2 and 3 handovers in IEEE 802.16e network 2224

**IEEE 802.16m**

IEEE 802.16: History, status and future trends 113

**IEEE 802.21**

Supporting mobility in an IMS-based P2P IPTV service: A proactive context transfer mechanism 1736

**IEEE-FIPA**

Fragment Transfer Protocol: An IEEE-FIPA based efficient transfer protocol for mobile agents 2203

**IEEE802.16e**

Nearly optimal power saving policies for mobile stations in wireless networks 595

**Importance scanning worms**

Creation of the importance scanning worm using information collected by Botnets 676

**IMS**

A prototype and demonstrator of Akogrimo's architecture: An approach of merging grids, SOA, and the mobile Internet 1304

**Incentive**

A secure model for controlling the hubs in P2P wireless network based on trust value 997

**Incentive mechanisms**

Distributed relay selection over multi-source and multi-relay wireless cooperative networks with selfish nodes 2145

**Information assurance**

Time-slotted voting mechanism for fusion data assurance in wireless sensor networks under stealthy attacks 1524

**Input queued switch**

Performance analysis of large multicast packet switches with multiple input queues and gathered traffic 803

**Inspection**

Distributed flow detection over multi-path sessions 816

**Integration**

Towards cross layer mobility support in metropolitan networks 202

**Intelligent transportation systems**

Vehicular telematics over heterogeneous wireless networks: A survey 775

**Inter-contact time**

HCMM: Modelling spatial and temporal properties of human mobility driven by users' social relationships 1056

**Inter-domain path computation**

Enhanced crankback signaling for multi-domain IP/MPLS networks 2215

**Interconnection networks**

A graph theoretic approach to ultrafast information distribution: Borel Cayley graph resizing algorithm 2093  
Networking in E-textiles 655

**Interference**

Interference and power constrained broadcast and multicast routing in wireless ad hoc networks using directional antennas 1428

**Interference-aware routing**

Interference-aware routing for multi-hop Wireless Mesh Networks 1961

**Internet**

- A critical look at power law modelling of the Internet 259
- Characterization of long-range dependent traffic regulated by leaky-bucket policers and shapers 714
- Passive internet measurement: Overview and guidelines based on experiences 533

**Internet Router-level topology**

- Characterizing and modeling the Internet Router-level topology – The hierarchical features and HIR model 2001

**Internet routers**

- Trading link utilization for queueing delays: An adaptive approach 1108

**Internet traffic**

- Simulating a Poisson cluster process for Internet traffic packet arrivals 612

**Intrusion detection**

- Accelerating the bit-split string matching algorithm using Bloom filters 1785
- An efficient network intrusion detection 477

**Intrusion Detection**

- Distributed flow detection over multi-path sessions 816

**IP forwarding**

- Modeling and analysis of PC-based software routers 1462

**IP lookup**

- Expediating IP lookups with reduced power via TBM and SST supernode caching 390

**IP Multimedia Subsystem (IMS)**

- Supporting mobility in an IMS-based P2P IPTV service: A proactive context transfer mechanism 1736

**IP routing**

- Modeling and analysis of PC-based software routers 1462

**IPTV**

- A cost-effective resource allocation and management scheme for content networks supporting IPTV services 83
- Admission region of triple-play services in wireless home networks 852

**IPv6**

- A fast IPv6 packet classification algorithm based on efficient multi-bit selection 1773
- Analytical characterization of failure recovery in REAP 485

**Irregular topology**

- An adaptive rendezvous data dissemination for irregular sensor networks with multiple sinks 176

**Iterated function system**

- QoSNET: An integrated QoS network for routing protocols in large scale wireless sensor networks 1334

**Jump size**

- HCMM: Modelling spatial and temporal properties of human mobility driven by users' social relationships 1056

**Jumping Random Walk agent**

- Random walk with jumps in large-scale random geometric graphs 1505

**Key management**

- LTE key management analysis with session keys context 1907
- Two-way Handshake protocol for improved security in IEEE 802.11 wireless LANs 1133

**Key separation**

- LTE key management analysis with session keys context 1907

**Key tree management**

- Computation-and-storage-efficient key tree management protocol for secure multicast communications 136

**Key-update distribution**

- Key-update distribution in secure group communication 689

**Latency**

- An energy-efficient and low-latency MAC protocol with Adaptive Scheduling for multi-hop wireless sensor networks 1452

**Layer 2 handover**

- Fuzzy logic based layers 2 and 3 handovers in IEEE 802.16e network 2224

**Layer 3 handover**

- Fuzzy logic based layers 2 and 3 handovers in IEEE 802.16e network 2224

**Layered media**

- Cross-layer quality-based resource reservation for scalable multimedia 283

**Layered multi-cast**

- A framework for reliability aware layered multi-cast in lossy networks with network coding 1651

**Light splitters placement**

- Placement of wavelength converters and light splitters in a WDM network using the generic graph model 868

**Limited drops**

- Wavelength assignment for all-to-all broadcast in WDM optical linear array with limited drops 1804

**Linear array**

- Wavelength assignment for all-to-all broadcast in WDM optical linear array with limited drops 1804

**Link adaptation**

- VPAL: Video Packet Adaptation Layer for reliable video multicast over IEEE 802.11n WLAN 2271

**Link capacity**

- Interference-aware routing for multi-hop Wireless Mesh Networks 1961

**Linux**

- Modeling and analysis of PC-based software routers 1462

**Load balancing**

- Adjustable convergencast tree protocol for wireless sensor networks 559

**Localization error**

- On accuracy of region based localization algorithms for wireless sensor networks 1391

**Location based services**

- Received signal strength based mobile terminal positioning error analysis and optimization 1227

**Location management**

- ALM: An adaptive location management scheme for approximate location queries in wireless sensor networks 1937

**Location privacy**

- Measuring long-term location privacy in vehicular communication systems 1414
- Private location-based information retrieval through user collaboration 762

**Location-based services**

- Private location-based information retrieval through user collaboration 762

**Long term evolution**

- QoE oriented cross-layer design of a resource allocation algorithm in beyond 3G systems 571

**Long-range dependence**

- A critical look at power law modelling of the Internet 259
- Characterization of long-range dependent traffic regulated by leaky-bucket policers and shapers 714
- Network queue and loss analysis using histogram-based traffic models 190

**Lossy network**

- A framework for reliability aware layered multi-cast in lossy networks with network coding 1651

**Lotka–Volterra (LV) competition model**

A bio-inspired approach for streaming applications in wireless sensor networks based on the Lotka–Volterra competition model 2039

**Lower bound**

On accuracy of region based localization algorithms for wireless sensor networks 1391

**LSP**

Multiple path selection algorithm for DiffServ-aware MPLS traffic engineering 1557

**LTE**

LTE, the radio technology path towards 4G 1894  
On the performance evaluation of an LTE SFBC system with Wiener channel estimation in frequency-selective channels 2031

**LTE security**

LTE key management analysis with session keys context 1907

**MAC protocols**

Asymptotic delay analysis and timeout-based admission control for ad hoc wireless networks with asymmetric users 2057

**MANET**

Dynamic Hello/Timeout timer adjustment in routing protocols for reducing overhead in MANETs 1864  
Providing forwarding assurance in multi-hop wireless networks 293

**Markov decision process**

Solving the uncertainty of vertical handovers in multi-radio home networks 1122

**Markov decision theory**

A collusion-resistant mechanism for autonomic resource management in Virtual Private Networks 2070

**Markov model**

Cross-layer quality-based resource reservation for scalable multimedia 283

**Max–min fairness**

TrainNet: A transport system for delivering non real-time data 1850

**Maximum coverage**

Planning roadside infrastructure for information dissemination in intelligent transportation systems 432

**Maximum likelihood estimation**

Creation of the importance scanning worm using information collected by Botnets 676

**Measurement**

Passive internet measurement: Overview and guidelines based on experiences 533

**Media distribution**

D-MORE: Dynamic mesh-based overlay peer-to-peer infrastructure 1191

**Media independent handover**

Media independent handover transport using cross-layer optimized stream control transmission protocol 1075

**Medium access control**

A non-cooperative game approach for power-aware MAC in ad hoc wireless networks 1440  
An energy-efficient and low-latency MAC protocol with Adaptive Scheduling for multi-hop wireless sensor networks 1452  
Use of aerial platforms for energy efficient medium access control in wireless sensor networks 500

**Memetic algorithms**

A memetic algorithm for optimal dynamic design of wireless sensor networks 250

**Mesh networks**

Fast certificate-based authentication scheme in multi-operator maintained wireless mesh networks 907

**Metric**

Measuring long-term location privacy in vehicular communication systems 1414

**Metropolitan**

Towards cross layer mobility support in metropolitan networks 202

**Military tactics**

Military tactics in agent-based sinkhole attack detection for wireless ad hoc networks 619

**MIMO**

Low-complexity detection by exploiting suboptimal detection order and subcarrier grouping for Multi-Layer MIMO-OFDM 756  
SAGE based joint timing-frequency offsets and channel estimation in distributed MIMO systems 2125

**MIMO broadcast channel**

Fairness maximization and delay analysis for multi-antenna broadcast channels using random beamforming 2116

**Min-Cut theorem**

Cost-bandwidth tradeoff in distributed storage systems 2105

**Mini-slot scheduling**

Mini-slot scheduling for IEEE 802.16d chain and grid mesh networks 2048

**Minimum cost**

Multicast three-stage Clos networks 923

**Minimum rate constraint**

Fairness maximization and delay analysis for multi-antenna broadcast channels using random beamforming 2116

**Minimum transmission time**

A minimum transmission time encoding algorithm in multi-rate wireless networks 222

**Mobile**

Network-assisted sink navigation for distributed data gathering: Stability and delay-energy trade-offs 160

**Mobile Ad Hoc Network**

A fully distributed node allocation scheme with partition protection for Mobile Ad Hoc Networks 1949

**Mobile ad hoc networks**

ECCK: An efficient clustering scheme for group key management in MANETs 1094

**Mobile Ad hoc networks**

Self-configured multipath routing using path lifetime for video-streaming services over Ad Hoc networks 1879

**Mobile ad-hoc networks**

Providing forwarding assurance in multi-hop wireless networks 293

**Mobile agents**

Fragment Transfer Protocol: An IEEE-FIPA based efficient transfer protocol for mobile agents 2203

**Mobile Internet**

A prototype and demonstrator of Akogrimo's architecture: An approach of merging grids, SOA, and the mobile Internet 1304

**Mobile IP**

Design of the multicast service for mobile users in the 802.16 network environment 1030

**Mobile IP (MIP)**

Supporting mobility in an IMS-based P2P IPTV service: A proactive context transfer mechanism 1736

**Mobile sensors**

Improving network lifetime with mobile wireless sensor networks 409

**Mobile sink**

DEEP: Density-based proactive data dissemination protocol for wireless sensor networks with uncontrolled sink mobility 929  
Efficient path planning and data gathering protocols for the wireless sensor network 398

**Mobile sinks**

Improving network lifetime with mobile wireless sensor networks 409

**Mobile TV**

Secure and traceable multimedia distribution for convergent Mobile TV services 1664

**Mobility**

Application-level assessment of approaches to coordinate node mobility in wireless sensor and actor networks 860  
Fuzzy logic based layers 2 and 3 handovers in IEEE 802.16e network 2224

**Mobility management**

Design of the multicast service for mobile users in the 802.16 network environment 1030  
Towards cross layer mobility support in metropolitan networks 202

**Mobility models**

HCCM: Modelling spatial and temporal properties of human mobility driven by users' social relationships 1056

**Model predictive control**

Implementation of MPC as an AQM controller 227

**Modeling**

Characterizing and modeling the Internet Router-level topology – The hierarchical features and HIR model 2001  
Generalized stochastic performance models for loss-based congestion control 513

**Modeling and measurement**

An efficient networking technique for synchronous e-learning platforms in corporate environments 1752

**Monitoring**

Passive internet measurement: Overview and guidelines based on experiences 533

**MSA**

Multiple path selection algorithm for DiffServ-aware MPLS traffic engineering 1557

**Multi Home Agent (MHA)**

Multi home agent and pointer-based (MHA-PB) location management scheme in integrated cellular-WLAN networks for frequent moving users 2260

**Multi-agent system**

From cognition to doction: The teaching radio paradigm for distributed & autonomous deployments 2015

**Multi-bit selection**

A fast IPv6 packet classification algorithm based on efficient multi-bit selection 1773

**Multi-channel**

A distributed channel assignment protocol for rate separation in wireless mesh networks 1281

**Multi-channel assignment**

Level the buffer wall: Fair channel assignment in wireless sensor networks 1370

**Multi-dimensional data**

Replica-aware, multi-dimensional range queries in Distributed Hash Tables 984

**Multi-domain**

A survey of survivability in multi-domain optical networks 1005

**Multi-domain networks**

Enhanced crankback signaling for multi-domain IP/MPLS networks 2215

**Multi-hop**

Improvement of multi-hop packet transmission scheduling in WDM optical star networks 706

**Multi-hop network**

Interference-aware routing for multi-hop Wireless Mesh Networks 1961

**Multi-hop networks**

Providing forwarding assurance in multi-hop wireless networks 293

**Multi-Layer**

Low-complexity detection by exploiting suboptimal detection order and subcarrier grouping for Multi-Layer MIMO-OFDM 756

**Multi-objective genetic algorithm**

Solving multi-objective routing and wavelength assignment in WDM network using hybrid evolutionary computation approach 2246

**Multi-path**

Distributed flow detection over multi-path sessions 816

**Multi-profile traffic**

An efficient analytical model for the dimensioning of WiMAX networks supporting multi-profile best effort traffic 1162

**Multi-rate**

A distributed channel assignment protocol for rate separation in wireless mesh networks 1281  
A minimum transmission time encoding algorithm in multi-rate wireless networks 222

**Multi-user diversity**

Survey on diversity-based routing in wireless mesh networks: Challenges and solutions 269

**Multicast**

A hybrid QoS multicast framework-based protocol for wireless mesh networks 2079

Design of the multicast service for mobile users in the 802.16 network environment 1030

Performance analysis of large multicast packet switches with multiple input queues and gathered traffic 803

Placement of wavelength converters and light splitters in a WDM network using the generic graph model 868

Tabu search algorithm for RP selection in PIM-SM multicast routing 35

**Multicast routing**

Mobility-based multicast routing algorithm for wireless mobile Ad-hoc networks: A learning automata approach 721

**Multicast throughput**

Improved asymptotic multicast throughput for random extended networks 2195

**Multicast traffic**

Multicast three-stage Clos networks 923

**Multicommodity flow**

Power-efficient radio configuration in fixed broadband wireless networks 898

**Multidimensional scaling**

Distributed wireless sensor network localization using stochastic proximity embedding 745

**Multihoming**

Media independent handover transport using cross-layer optimized stream control transmission protocol 1075

**Multimedia**

Dynamic guard margin CAC algorithm with ensured QoS and low CDP in heterogeneous wireless networks 1645

Utility-proportional bandwidth sharing for multimedia transmission supporting scalable video coding 1543

**Multimedia coding**

Media coding for the next generation mobile system LTE 1916

**Multimedia networking**

An efficient networking technique for synchronous e-learning platforms in corporate environments 1752

**Multimedia sensor networks**

A distortion-minimizing rate controller for wireless multimedia sensor networks 1380

**Multimedia sharing**

Joint admission and rate control for multimedia sharing in wireless home networks 1632

**Multipath routing**

- A resequencing model for high-speed packet-switching networks 443
- Self-configured multipath routing using path lifetime for video-streaming services over Ad Hoc networks 1879

**Multiple interfaces**

- Routing exploiting multiple heterogeneous wireless interfaces: A TCP performance study 23

**NAT**

- SCTP multihoming provisioning in converged IP-based multimedia environment 1725

**NATFW NSLP**

- SCTP multihoming provisioning in converged IP-based multimedia environment 1725

**Near-insensitivity**

- Effective load for flow-level performance modelling of file transfers in wireless LANs 1972

**Network coding**

- A framework for reliability aware layered multi-cast in lossy networks with network coding 1651
- A minimum transmission time encoding algorithm in multi-rate wireless networks 222
- Block-Markov encoding with network coding for cooperative communications 2021
- Cost-bandwidth tradeoff in distributed storage systems 2105
- Survey on diversity-based routing in wireless mesh networks: Challenges and solutions 269

**Network convergence**

- A hybrid game model based on reputation for spectrum allocation in wireless networks 1623

**Network deployment**

- Planning roadside infrastructure for information dissemination in intelligent transportation systems 432

**Network dimensioning**

- Robust network dimensioning for realtime services over IP networks with traffic deviation 976

**Network heterogeneity**

- Peer-to-peer video-on-demand with scalable video coding 1589

**Network lifetime**

- An energy-efficient data gathering algorithm to prolong lifetime of wireless sensor networks 639
- Research on the energy hole problem based on unequal cluster-radius for wireless sensor networks 302
- The optimization of sensor relocation in wireless mobile sensor networks 828

**Network measurement**

- Task-execution scheduling schemes for network measurement and monitoring 124

**Network modeling**

- A graph theoretic approach to ultrafast information distribution: Borel Cayley graph resizing algorithm 2093

**Network modelling**

- A critical look at power law modelling of the Internet 259

**Network performance evaluation**

- Network queue and loss analysis using histogram-based traffic models 190

**Network Re-optimization**

- A GRASP-based network re-optimization strategy for improving RWA in multi-constrained optical transport infrastructures 1809

**Network robustness**

- A review of DoS attack models for 3G cellular networks from a system-design perspective 551

**Network scalability**

- An efficient networking technique for synchronous e-learning platforms in corporate environments 1752

**Network security**

- An efficient network intrusion detection 477

**Network stability**

- The impact of dynamic adversarial attacks on the stability of heterogeneous multimedia networks 1695

**Network utility**

- Nonconvex maximization for communication systems based on particle swarm optimization 841
- Trading link utilization for queueing delays: An adaptive approach 1108

**Networks**

- Distributed flow detection over multi-path sessions 816

**Neural network approximator**

- Implementation of MPC as an AQM controller 227

**Next generation network**

- End-to-end quality of service specification and mapping: The third party approach 1354

**Next generation networks**

- Privacy-enhanced fast re-authentication for EAP-based next generation network 1682

**Node allocation**

- A fully distributed node allocation scheme with partition protection for Mobile Ad Hoc Networks 1949

**Node churn**

- Minimizing node churn in peer-to-peer streaming 1598

**Node churn model**

- Minimizing node churn in peer-to-peer streaming 1598

**Node scheduling**

- A three-tiered node scheduling scheme for sparse sensing in wireless sensor networks 350

**Non-blocking conditions**

- Multicast three-stage Clos networks 923

**Nonconcave**

- Nonconvex maximization for communication systems based on particle swarm optimization 841

**Nonlinear control**

- Decentralized power control in cellular mobile radio systems with nonlinear and time-varying link gains 1210

**Object tracking**

- A global profile-based algorithm for energy minimization in object tracking sensor networks 736

**OBS**

- Using updated neighbor state information for efficient contention avoidance in OBS networks 65

**Occupancy theory**

- Improved asymptotic multicast throughput for random extended networks 2195

**OFDM**

- Low-complexity detection by exploiting suboptimal detection order and subcarrier grouping for Multi-Layer MIMO-OFDM 756

**OFDMA**

- Downlink resource management for QoS scheduling in IEEE 802.16 WiMAX networks 940

**OLT**

- User-oriented hierarchical bandwidth scheduling for ethernet passive optical networks 965

**Online algorithms**

- Network-assisted sink navigation for distributed data gathering: Stability and delay-energy trade-offs 160

**ONU**

- User-oriented hierarchical bandwidth scheduling for ethernet passive optical networks 965

**Opportunistic communication**

- Privacy and confidentiality in context-based and epidemic forwarding 1493

**Opportunistic routing**

Survey on diversity-based routing in wireless mesh networks:  
Challenges and solutions 269

**Optical burst switching**

On modeling optical burst switching networks with fiber delay  
lines: A novel approach 240

**Optical network**

A survey of survivability in multi-domain optical  
networks 1005

**Optimal data storage**

Achieving optimal data storage position in wireless sensor  
networks 92

**Optimization**

A framework for reliability aware layered multi-cast in lossy  
networks with network coding 1651  
Convergence of trajectories and optimal buffer sizing for MIMD  
congestion control 149  
Tabu search algorithm for RP selection in PIM-SM multicast  
routing 35

**Orthogonal frequency division multiple access**

IEEE 802.16: History, status and future trends 113

**Outage probability**

Block-Markov encoding with network coding for cooperative  
communications 2021

**Overhead reduction**

Dynamic Hello/Timeout timer adjustment in routing protocols  
for reducing overhead in MANETs 1864

**Overlay multicast**

An efficient networking technique for synchronous e-learning  
platforms in corporate environments 1752  
D-MORE: Dynamic mesh-based overlay peer-to-peer  
infrastructure 1191

**Overlay network**

OverCourt: DDoS mitigation through credit-based traffic  
segregation and path migration 2164  
SCTP for robust and flexible IP anycast services 365

**p-Cycle**

A survey of survivability in multi-domain optical  
networks 1005

**P2P file sharing**

A BitTorrent proxy for Green Internet file sharing: Design and  
experimental evaluation 794

**P2P traffic identification**

Identify P2P traffic by inspecting data transfer behavior 1141

**Packet classification**

A fast IPv6 packet classification algorithm based on efficient  
multi-bit selection 1773  
Hierarchical packet classification using a Bloom filter and rule-  
priority tries 1215

**Packet switch**

Performance analysis of large multicast packet switches with  
multiple input queues and gathered traffic 803

**Packet train**

TCP-friendly congestion control for the fair streaming of  
scalable video 1578

**Parallel queues**

A resequencing model for high-speed packet-switching  
networks 443

**Pareto distribution**

On the statistical characterization of flows in Internet traffic  
with application to sampling 103

**Pareto set**

Convergence of trajectories and optimal buffer sizing for MIMD  
congestion control 149

**Partial cover**

Random walk with jumps in large-scale random geometric  
graphs 1505

**Participatory sensing**

Preserving privacy in participatory sensing systems 1266

**Particle Swarm Optimization (PSO)**

Bandwidth allocation with a particle swarm meta-heuristic for  
ethernet passive optical networks 526

**Partition protections**

A fully distributed node allocation scheme with partition  
protection for Mobile Ad Hoc Networks 1949

**Passive**

Passive internet measurement: Overview and guidelines based  
on experiences 533  
Privacy versus scalability in radio frequency identification  
systems 2155

**Path control**

SCTP multihoming provisioning in converged IP-based  
multimedia environment 1725

**Path lifetime**

Self-configured multipath routing using path lifetime for video-  
streaming services over Ad Hoc networks 1879

**Path migration**

OverCourt: DDoS mitigation through credit-based traffic  
segregation and path migration 2164

**Path planning**

Efficient path planning and data gathering protocols for the  
wireless sensor network 398

**Peer selection strategies**

Minimizing node churn in peer-to-peer streaming 1598

**Peer-to-peer**

A secure model for controlling the hubs in P2P wireless  
network based on trust value 997  
D-MORE: Dynamic mesh-based overlay peer-to-peer  
infrastructure 1191  
Peer-to-peer video-on-demand with scalable video  
coding 1589

**Peer-to-Peer (P2P)**

Supporting mobility in an IMS-based P2P IPTV service: A  
proactive context transfer mechanism 1736

**Peer-to-peer networks**

Skiptree: A new scalable distributed data structure on  
multidimensional data supporting range-queries 73

**Peer-to-peer streaming**

Minimizing node churn in peer-to-peer streaming 1598

**Peer-to-peer systems**

Replica-aware, multi-dimensional range queries in Distributed  
Hash Tables 984

**Percolation**

QoSNET: An integrated QoS network for routing protocols in  
large scale wireless sensor networks 1334

**Performance**

Fragment Transfer Protocol: An IEEE-FIPA based efficient  
transfer protocol for mobile agents 2203

**Performance analysis**

Improving performance of backpressured packet networks by  
integrating with an end-to-end congestion control  
algorithm 43

Performance analysis of large multicast packet switches with  
multiple input queues and gathered traffic 803

**Performance analysis based on traffic monitoring**

QoS analysis of video streaming service in live cellular  
networks 322

**Performance evaluation**

A novel SIP based procedure for congestion aware handover in  
heterogeneous networks 2176

An efficient analytical model for the dimensioning of  
WiMAX networks supporting multi-profile best effort  
traffic 1162

Admission region of triple-play services in wireless home networks 852
- Quality-of-service**  
Joint admission and rate control for multimedia sharing in wireless home networks 1632
- Queueing systems**  
Modeling and analysis of PC-based software routers 1462

**Queueing theory**

Performance analysis of large multicast packet switches with multiple input queues and gathered traffic 803

**Queueing analysis**

Characterization of long-range dependent traffic regulated by leaky-bucket policers and shapers 714

**Queueing systems with impatient customers**

On modeling optical burst switching networks with fiber delay lines: A novel approach 240

**Rabin fingerprint**

Identify P2P traffic by inspecting data transfer behavior 1141

**Radio Access Network**

LTE, the radio technology path towards 4G 1894

**Radio configuration**

Power-efficient radio configuration in fixed broadband wireless networks 898

**Radio frequency identification (RFID)**

Privacy versus scalability in radio frequency identification systems 2155

**Radio resource management**

Downlink resource management for QoS scheduling in IEEE 802.16 WiMAX networks 940

**Radio Resource management**

LTE, the radio technology path towards 4G 1894

**Random beamforming**

Fairness maximization and delay analysis for multi-antenna broadcast channels using random beamforming 2116

**Random geometric graphs**

Random walk with jumps in large-scale random geometric graphs 1505

**Random networks**

Improved asymptotic multicast throughput for random extended networks 2195

**Random walk agent**

Random walk with jumps in large-scale random geometric graphs 1505

**Range queries**

Replica-aware, multi-dimensional range queries in Distributed Hash Tables 984

**Range query**

Skip-tree: A new scalable distributed data structure on multidimensional data supporting range-queries 73

**Raptor code**

VPAL: Video Packet Adaptation Layer for reliable video multicast over IEEE 802.11n WLAN 2271

**Rate control**

A distortion-minimizing rate controller for wireless multimedia sensor networks 1380

Joint admission and rate control for multimedia sharing in wireless home networks 1632

Utility-proportional bandwidth sharing for multimedia transmission supporting scalable video coding 1543

**Rate guarantees**

Birkhoff-von Neumann switching with statistical traffic profiles 848

**Reachability**

Analytical characterization of failure recovery in REAP 485

**Real-time communication**

A forcing collision resolution approach able to prioritize traffic in CSMA-based networks 54

**Realtime traffic**

Robust network dimensioning for realtime services over IP networks with traffic deviation 976

**Received signal strength**

Received signal strength based mobile terminal positioning error analysis and optimization 1227

**Recipient anonymity**

Survey on anonymous communications in computer networks 420

**Region based localization**

On accuracy of region based localization algorithms for wireless sensor networks 1391

**Relationship anonymity**

Survey on anonymous communications in computer networks 420

**Relay attack**

Attacks on a distance bounding protocol 884

**Relay selection**

Distributed relay selection over multi-source and multi-relay wireless cooperative networks with selfish nodes 2145

**Reliability guarantee**

A framework for reliability aware layered multi-cast in lossy networks with network coding 1651

**Remote voting**

Simple and efficient hash-based verifiable mixing for remote electronic voting 667

**Rendezvous data dissemination**

An adaptive rendezvous data dissemination for irregular sensor networks with multiple sinks 176

**Reneging**

Throughput analysis of Non-Renegable Selective Acknowledgments (NR-SACKs) for SCTP 1982

**Replication**

Replica-aware, multi-dimensional range queries in Distributed Hash Tables 984

**Reputation**

A hybrid game model based on reputation for spectrum allocation in wireless networks 1623

**Resequencing**

A resequencing model for high-speed packet-switching networks 443

**Resource allocation**

A cost-effective resource allocation and management scheme for content networks supporting IPTV services 83

Dynamic guard margin CAC algorithm with ensured QoS and low CDP in heterogeneous wireless networks 1645

**Resource hogs**

Controlling resource hogs in mobile delay-tolerant networks 2

**Resource management**

Controlling resource hogs in mobile delay-tolerant networks 2

Novel dynamic delay allocation adjustment for improving bandwidth efficiency 463

**Resource reservation**

Cross-layer quality-based resource reservation for scalable multimedia 283

**Resource state information**

Using updated neighbor state information for efficient contention avoidance in OBS networks 65

**RF measurements**

QoS analysis of video streaming service in live cellular networks 322

**RFID**

A fast zero estimation scheme for RFID systems 1318

Attacks on a distance bounding protocol 884

Optimal frame size analysis for framed slotted ALOHA based RFID networks 648

**Robustness**

Analytical characterization of failure recovery in REAP 485

**Route prediction**

BGP route prediction within ISPs 1180

**Route stability**

A cross-layer stability-based routing mechanism for ultra wideband networks 2185

**Routing**

HYMAD: Hybrid DTN-MANET routing for dense and highly dynamic wireless networks 1483  
QoSNET: An integrated QoS network for routing protocols in large scale wireless sensor networks 1334

**Routing algorithms**

An energy-efficient data gathering algorithm to prolong lifetime of wireless sensor networks 639

**Routing and wavelength assignment**

Solving multi-objective routing and wavelength assignment in WDM network using hybrid evolutionary computation approach 2246

**Routing hole**

Virtual position based geographic routing for wireless sensor networks 1255

**Routing protocols**

A holistic approach to wireless sensor network routing in underground tunnel environments 1566

**Routing tree**

Mini-slot scheduling for IEEE 802.16d chain and grid mesh networks 2048

**RP selection**

Tabu search algorithm for RP selection in PIM-SM multicast routing 35

**rtPS**

Discrete-time modeling for performance analysis of real-time services in IEEE 802.16 networks 1928

**Rule-priority trie**

Hierarchical packet classification using a Bloom filter and rule-priority tries 1215

**RWA**

A GRASP-based network re-optimization strategy for improving RWA in multi-constrained optical transport infrastructures 1809

**SACK**

Throughput analysis of Non-Renegable Selective Acknowledgments (NR-SACKs) for SCTP 1982

**Scalability**

Privacy versus scalability in radio frequency identification systems 2155

**Scalable video**

Cross-layer quality-based resource reservation for scalable multimedia 283

**Scalable video coding**

Peer-to-peer video-on-demand with scalable video coding 1589  
TCP-friendly congestion control for the fair streaming of scalable video 1578

**Scalable video coding (SVC)**

Utility-proportional bandwidth sharing for multimedia transmission supporting scalable video coding 1543

**Scale-free networks**

A critical look at power law modelling of the Internet 259

**Scan**

Enabling faster and smoother handoffs in AP-dense 802.11 wireless networks 1795

**Schedule length**

Improvement of multi-hop packet transmission scheduling in WDM optical star networks 706

**Scheduler**

Performance evaluation of a new QoS packet-scheduler for VoIP service in IEEE 802.16-based WMAN systems 589

**Scheduling**

Fairness provisioning in multi-hop wireless backhaul networks: Challenges and solutions 1767  
Peer-to-peer video-on-demand with scalable video coding 1589  
QoS-aware data reporting control in cluster-based wireless sensor networks 1244  
Task-execution scheduling schemes for network measurement and monitoring 124  
TrainNet: A transport system for delivering non real-time data 1850

**Scheduling services**

Discrete-time modeling for performance analysis of real-time services in IEEE 802.16 networks 1928

**SCTP**

Media independent handover transport using cross-layer optimized stream control transmission protocol 1075  
SCTP for robust and flexible IP anycast services 365  
SCTP multihoming provisioning in converged IP-based multimedia environment 1725  
Throughput analysis of Non-Renegable Selective Acknowledgments (NR-SACKs) for SCTP 1982

**Seamless handoff**

Privacy-enhanced fast re-authentication for EAP-based next generation network 1682

**Seamless handover**

A novel SIP based procedure for congestion aware handover in heterogeneous networks 2176

**Search**

A content-guided publish/subscribe mechanism for sensor networks without location information 1515

**Secure group communication**

Key-update distribution in secure group communication 689

**Secure interval multicast**

Key-update distribution in secure group communication 689

**Secure multicast**

Computation-and-storage-efficient key tree management protocol for secure multicast communications 136

**Secure multimedia distribution**

Secure and traceable multimedia distribution for convergent Mobile TV services 1664

**Security**

A multi-path interleaved hop-by-hop en-route filtering scheme in wireless sensor networks 1202  
A secure model for controlling the hubs in P2P wireless network based on trust value 997  
An efficient fault-tolerant group key agreement protocol 890  
Military tactics in agent-based sinkhole attack detection for wireless ad hoc networks 619

**Self-certified public keys**

A new secure password authenticated key agreement scheme for SIP using self-certified public keys on elliptic curves 372

**Self-configuration**

Self-configured multipath routing using path lifetime for video-streaming services over Ad Hoc networks 1879

**Sender anonymity**

Survey on anonymous communications in computer networks 420

**Sensor movement-assisted deployment**

The optimization of sensor relocation in wireless mobile sensor networks 828

**Sensor network**

An adaptive rendezvous data dissemination for irregular sensor networks with multiple sinks 176

- Network-assisted sink navigation for distributed data gathering: Stability and delay-energy trade-offs 160
- Sensor networks**
- A content-guided publish/subscribe mechanism for sensor networks without location information 1515
  - A global profile-based algorithm for energy minimization in object tracking sensor networks 736
  - Denial of service attack-resistant flooding authentication in wireless sensor networks 1531
  - On accuracy of region based localization algorithms for wireless sensor networks 1391
  - QoSNET: An integrated QoS network for routing protocols in large scale wireless sensor networks 1334
- Service class selection**
- End-to-end quality of service specification and mapping: The third party approach 1354
- Service level agreement**
- End-to-end quality of service specification and mapping: The third party approach 1354
- Service negotiation**
- End-to-end quality of service specification and mapping: The third party approach 1354
- Session Initial Protocol**
- A new secure password authenticated key agreement scheme for SIP using self-certified public keys on elliptic curves 372
- Session Initiation Protocol**
- A SIP-based web client for HTTP session mobility and multimedia services 954
- Session keys context**
- LTE key management analysis with session keys context 1907
- Shape shifting trie (SST)**
- Expediating IP lookups with reduced power via TBM and SST supernode caching 390
- Shared backup path protection (SBPP)**
- Spare capacity reprovisioning for high availability shared backup path protection connections 603
- Shared Segment Protection (SSP)**
- Switching/merging node placement in survivable optical networks with SSP 381
- SHIM6**
- Analytical characterization of failure recovery in REAP 485
- Signaling attacks**
- A review of DoS attack models for 3G cellular networks from a system-design perspective 551
- Simulation**
- Simulating a Poisson cluster process for Internet traffic packet arrivals 612
- Sink mobility**
- An adaptive rendezvous data dissemination for irregular sensor networks with multiple sinks 176
- SIP**
- A novel SIP based procedure for congestion aware handover in heterogeneous networks 2176
  - A prototype and demonstrator of Akogrimo's architecture: An approach of merging grids, SOA, and the mobile Internet 1304
  - A secure and efficient SIP authentication scheme for converged VoIP networks 1674
- SkipNet**
- Skiptree: A new scalable distributed data structure on multidimensional data supporting range-queries 73
- Slack**
- Novel dynamic delay allocation adjustment for improving bandwidth efficiency 463
- Slotted ALOHA**
- Optimal frame size analysis for framed slotted ALOHA based RFID networks 648
- SoA**
- A prototype and demonstrator of Akogrimo's architecture: An approach of merging grids, SOA, and the mobile Internet 1304
- Social network theory**
- HCMM: Modelling spatial and temporal properties of human mobility driven by users' social relationships 1056
- Soft state protocol**
- Dynamic Hello/Timeout timer adjustment in routing protocols for reducing overhead in MANETs 1864
- Software routers**
- Modeling and analysis of PC-based software routers 1462
- Source anonymous message authentication**
- Survey on anonymous communications in computer networks 420
- Spare capacity reprovisioning**
- Spare capacity reprovisioning for high availability shared backup path protection connections 603
- Sparse sensing**
- A three-tiered node scheduling scheme for sparse sensing in wireless sensor networks 350
- Spatial reuse**
- Efficient algorithms to solve Broadcast Scheduling problem in WiMAX mesh networks 1325
- Spectrum allocation**
- A hybrid game model based on reputation for spectrum allocation in wireless networks 1623
- Stability**
- Analysis of efficient and fair explicit congestion control protocol with feedback delay: Stability and convergence 1992
  - Convergence of trajectories and optimal buffer sizing for MIMD congestion control 149
- Stateful communications**
- SCTP for robust and flexible IP anycast services 365
- Statistical models**
- On the statistical characterization of flows in Internet traffic with application to sampling 103
- Statistical optimization**
- Birkhoff-von Neumann switching with statistical traffic profiles 848
- Stealthy attack**
- Time-slotted voting mechanism for fusion data assurance in wireless sensor networks under stealthy attacks 1524
- Steiner connected dominating set**
- Mobility-based multicast routing algorithm for wireless mobile Ad-hoc networks: A learning automata approach 721
- Stochastic proximity embedding**
- Distributed wireless sensor network localization using stochastic proximity embedding 745
- Streaming applications**
- A bio-inspired approach for streaming applications in wireless sensor networks based on the Lotka–Volterra competition model 2039
- String matching**
- Accelerating the bit-split string matching algorithm using Bloom filters 1785
- Supernode**
- Expediating IP lookups with reduced power via TBM and SST supernode caching 390
- Survivability**
- A survey of survivability in multi-domain optical networks 1005
- Switching**
- Multicast three-stage Clos networks 923
- Switching/merging (S/M)**
- Switching/merging node placement in survivable optical networks with SSP 381

**Synchronous e-learning**

An efficient networking technique for synchronous e-learning platforms in corporate environments 1752

**Tabu search**

Tabu search algorithm for RP selection in PIM-SM multicast routing 35

**Tactical agents**

Military tactics in agent-based sinkhole attack detection for wireless ad hoc networks 619

**Tag estimation**

A fast zero estimation scheme for RFID systems 1318

**TCP**

Generalized stochastic performance models for loss-based congestion control 513  
Routing exploiting multiple heterogeneous wireless interfaces: A TCP performance study 23  
Throughput analysis of Non-Renegable Selective Acknowledgments (NR-SACKs) for SCTP 1982

**TCP Reno**

CODE TCP: A competitive delay-based TCP 1013

**TCP Vegas**

CODE TCP: A competitive delay-based TCP 1013

**TCP-friendly**

TCP-friendly congestion control for the fair streaming of scalable video 1578

**Television over IP (IPTV)**

Supporting mobility in an IMS-based P2P IPTV service: A proactive context transfer mechanism 1736

**Throughput**

Bandwidth allocation with a particle swarm meta-heuristic for ethernet passive optical networks 526  
Interference-aware routing for multi-hop Wireless Mesh Networks 1961

**Timing offset estimation**

SAGE based joint timing-frequency offsets and channel estimation in distributed MIMO systems 2125

**Topology aggregation**

A survey of survivability in multi-domain optical networks 1005

**Topology control**

The optimization of sensor relocation in wireless mobile sensor networks 828

**Tradeoff**

Cross-layer wireless video adaptation: Tradeoff between distortion and delay 1615

**Traffic control (communication)**

Characterization of long-range dependent traffic regulated by leaky-bucket policers and shapers 714

**Traffic management**

Identify P2P traffic by inspecting data transfer behavior 1141

**Traffic modelling**

Network queue and loss analysis using histogram-based traffic models 190

**Transfer times**

Generalized stochastic performance models for loss-based congestion control 513

**Transport layer multihoming**

SCTP multihoming provisioning in converged IP-based multimedia environment 1725

**Transport layer protocol**

CODE TCP: A competitive delay-based TCP 1013

**Tree**

The room shortage problem of tree-based ZigBee/IEEE 802.15.4 wireless networks 454

**Tree bitmap (TBM)**

Expediating IP lookups with reduced power via TBM and SST supernode caching 390

**Trust**

ECCK: An efficient clustering scheme for group key management in MANETs 1094

**Trust management**

Trust management systems for wireless sensor networks: Best practices 1086

**Trusted third parties**

Private location-based information retrieval through user collaboration 762

**Trustworthy networks**

The impact of dynamic adversarial attacks on the stability of heterogeneous multimedia networks 1695

**Tuning latency**

Improvement of multi-hop packet transmission scheduling in WDM optical star networks 706

**Tunnel convergence problem**

Design of the multicast service for mobile users in the 802.16 network environment 1030

**Ubiquitous computing**

A secure and efficient SIP authentication scheme for converged VoIP networks 1674

**UGS**

Discrete-time modeling for performance analysis of real-time services in IEEE 802.16 networks 1928

**UMTS**

Dynamic guard margin CAC algorithm with ensured QoS and low CDP in heterogeneous wireless networks 1645

**Underground tunnel**

A holistic approach to wireless sensor network routing in underground tunnel environments 1566

**Unequal cluster-radius**

Research on the energy hole problem based on unequal cluster-radius for wireless sensor networks 302

**Universal Mobile Telecommunication system (UMTS)**

Multi home agent and pointer-based (MHA-PB) location management scheme in integrated cellular-WLAN networks for frequent moving users 2260

**Unmanned ground and airborne vehicles**

Network-assisted sink navigation for distributed data gathering: Stability and delay-energy trade-offs 160

**Untrusted user collaboration**

Private location-based information retrieval through user collaboration 762

**User-oriented hierarchical bandwidth scheduling algorithm**

User-oriented hierarchical bandwidth scheduling for ethernet passive optical networks 965

**Utility function**

QoE oriented cross-layer design of a resource allocation algorithm in beyond 3G systems 571

**Utility max-min fair**

Birkhoff-von Neumann switching with statistical traffic profiles 848

**Utility-proportional fairness**

Utility-proportional bandwidth sharing for multimedia transmission supporting scalable video coding 1543

**UWB**

A cross-layer stability-based routing mechanism for ultra wideband networks 2185

**VCG mechanism design**

A collusion-resistant mechanism for autonomic resource management in Virtual Private Networks 2070

**Vehicular communication systems**

Measuring long-term location privacy in vehicular communication systems 1414

**Vehicular networks**

Planning roadside infrastructure for information dissemination in intelligent transportation systems 432

**Vehicular telematics**

Vehicular telematics over heterogeneous wireless networks: A survey 775

**Vertical handover**

Environment-aware QoS framework for multi-interface terminal 1049  
Solving the uncertainty of vertical handovers in multi-radio home networks 1122

**Video coding**

Media coding for the next generation mobile system LTE 1916

**Video encryption**

Secure and traceable multimedia distribution for convergent Mobile TV services 1664

**Video multicast**

VPAL: Video Packet Adaptation Layer for reliable video multicast over IEEE 802.11n WLAN 2271

**Video servers**

A cost-effective resource allocation and management scheme for content networks supporting IPTV services 83

**Video traffic modeling**

Modeling multiplexed traffic from H.264/AVC videoconference streams 1235

**Video-on-demand**

Peer-to-peer video-on-demand with scalable video coding 1589

**Video-streaming services**

Self-configured multipath routing using path lifetime for video-streaming services over Ad Hoc networks 1879

**VoD**

A cost-effective resource allocation and management scheme for content networks supporting IPTV services 83

**Voice coding**

Media coding for the next generation mobile system LTE 1916

**Voice over Internet Protocol**

A new secure password authenticated key agreement scheme for SIP using self-certified public keys on elliptic curves 372

**VoIP**

A callback mechanism for Private Telecommunications Networks 583  
Achieving maximal VoIP calls in 802.11 wireless networks 1296  
Performance evaluation of a new QoS packet-scheduler for VoIP service in IEEE 802.16-based WMAN systems 589

**VoIP gateway**

A callback mechanism for Private Telecommunications Networks 583

**VoIP UMTS**

QoE-driven dynamic management proposals for 3G VoIP services 1707

**Wavelength assignment**

Wavelength assignment for all-to-all broadcast in WDM optical linear array with limited drops 1804

**Wavelength converters placement**

Placement of wavelength converters and light splitters in a WDM network using the generic graph model 868

**Wavelength division multiplexing (WDM)**

Improvement of multi-hop packet transmission scheduling in WDM optical star networks 706  
Wavelength assignment for all-to-all broadcast in WDM optical linear array with limited drops 1804

**Wavelength-routing**

A GRASP-based network re-optimization strategy for improving RWA in multi-constrained optical transport infrastructures 1809

**WDM network**

Solving multi-objective routing and wavelength assignment in WDM network using hybrid evolutionary computation approach 2246

**WDM networks**

Placement of wavelength converters and light splitters in a WDM network using the generic graph model 868

**Web browser**

A SIP-based web client for HTTP session mobility and multimedia services 954

**Web share**

A SIP-based web client for HTTP session mobility and multimedia services 954

**Weibull distribution**

Nearly optimal power saving policies for mobile stations in wireless networks 595

**Weighted fairness**

Bandwidth allocation with a particle swarm meta-heuristic for ethernet passive optical networks 526

**Wiener estimation**

On the performance evaluation of an LTE SFBC system with Wiener channel estimation in frequency-selective channels 2031

**WiMAX**

An efficient analytical model for the dimensioning of WiMAX networks supporting multi-profile best effort traffic 1162  
Discrete-time modeling for performance analysis of real-time services in IEEE 802.16 networks 1928  
Downlink resource management for QoS scheduling in IEEE 802.16 WiMAX networks 940  
IEEE 802.16: History, status and future trends 113  
Mini-slot scheduling for IEEE 802.16d chain and grid mesh networks 2048

**WiMAX mesh networks**

Efficient algorithms to solve Broadcast Scheduling problem in WiMAX mesh networks 1325

**Wireless ad hoc network**

Interference and power constrained broadcast and multicast routing in wireless ad hoc networks using directional antennas 1428

**Wireless ad hoc networks**

Military tactics in agent-based sinkhole attack detection for wireless ad hoc networks 619

**Wireless backhaul networks**

Fairness provisioning in multi-hop wireless backhaul networks: Challenges and solutions 1767

**Wireless LANs**

Effective load for flow-level performance modelling of file transfers in wireless LANs 1972

**Wireless Local Area Networks (WLAN)**

Multi home agent and pointer-based (MHA-PB) location management scheme in integrated cellular-WLAN networks for frequent moving users 2260

**Wireless mesh network**

A hybrid QoS multicast framework-based protocol for wireless mesh networks 2079  
Implementation frameworks for IEEE 802.11s systems 336  
Mini-slot scheduling for IEEE 802.16d chain and grid mesh networks 2048

**Wireless Mesh Network (WMN)**

Interference-aware routing for multi-hop Wireless Mesh Networks 1961

**Wireless mesh networks**

A distributed channel assignment protocol for rate separation in wireless mesh networks 1281  
Survey on diversity-based routing in wireless mesh networks: Challenges and solutions 269

**Wireless mobile Ad-hoc networks**

Mobility-based multicast routing algorithm for wireless mobile Ad-hoc networks: A learning automata approach 721

**Wireless multi-hop network**

Routing exploiting multiple heterogeneous wireless interfaces: A TCP performance study 23

**Wireless network**

A minimum transmission time encoding algorithm in multi-rate wireless networks 222  
The room shortage problem of tree-based ZigBee/IEEE 802.15.4 wireless networks 454

**Wireless networks**

A forcing collision resolution approach able to prioritize traffic in CSMA-based networks 54

**Wireless propagation**

A holistic approach to wireless sensor network routing in underground tunnel environments 1566

**Wireless sensor and actor networks**

Application-level assessment of approaches to coordinate node mobility in wireless sensor and actor networks 860

**Wireless sensor network**

A novel stable selection and reliable transmission protocol for clustered heterogeneous wireless sensor networks 1843  
A three-tiered node scheduling scheme for sparse sensing in wireless sensor networks 350  
An energy-efficient data gathering algorithm to prolong lifetime of wireless sensor networks 639  
Efficient path planning and data gathering protocols for the wireless sensor network 398  
Hierarchical distributed data classification in wireless sensor networks 1404

**Wireless sensor networks**

A holistic approach to wireless sensor network routing in underground tunnel environments 1566  
A memetic algorithm for optimal dynamic design of wireless sensor networks 250  
Achieving optimal data storage position in wireless sensor networks 92  
Adjustable convergecast tree protocol for wireless sensor networks 559  
ALM: An adaptive location management scheme for approximate location queries in wireless sensor networks 1937  
An energy-efficient and low-latency MAC protocol with Adaptive Scheduling for multi-hop wireless sensor networks 1452  
Deploying multiple interconnected gateways in heterogeneous wireless sensor networks: An optimization approach 1151

Distributed wireless sensor network localization using stochastic proximity embedding 745

Improving network lifetime with mobile wireless sensor networks 409

QoS-aware data reporting control in cluster-based wireless sensor networks 1244

Research on the energy hole problem based on unequal cluster-radius for wireless sensor networks 302

**Wireless Sensor Networks**

The optimization of sensor relocation in wireless mobile sensor networks 828

**Wireless sensor networks**

Time-slotted voting mechanism for fusion data assurance in wireless sensor networks under stealthy attacks 1524

Trust management systems for wireless sensor networks: Best practices 1086

Use of aerial platforms for energy efficient medium access control in wireless sensor networks 500

Virtual position based geographic routing for wireless sensor networks 1255

**Wireless sensor networks (WSNs)**

A bio-inspired approach for streaming applications in wireless sensor networks based on the Lotka–Volterra competition model 2039

A multi-path interleaved hop-by-hop en-route filtering scheme in wireless sensor networks 1202

**Wireless video communications**

Cross-layer wireless video adaptation: Tradeoff between distortion and delay 1615

**WLAN**

Achieving maximal VoIP calls in 802.11 wireless networks 1296

**Worm virulence estimation**

Creation of the importance scanning worm using information collected by Botnets 676

**WPAN**

Achieving maximal VoIP calls in 802.11 wireless networks 1296

**WSN**

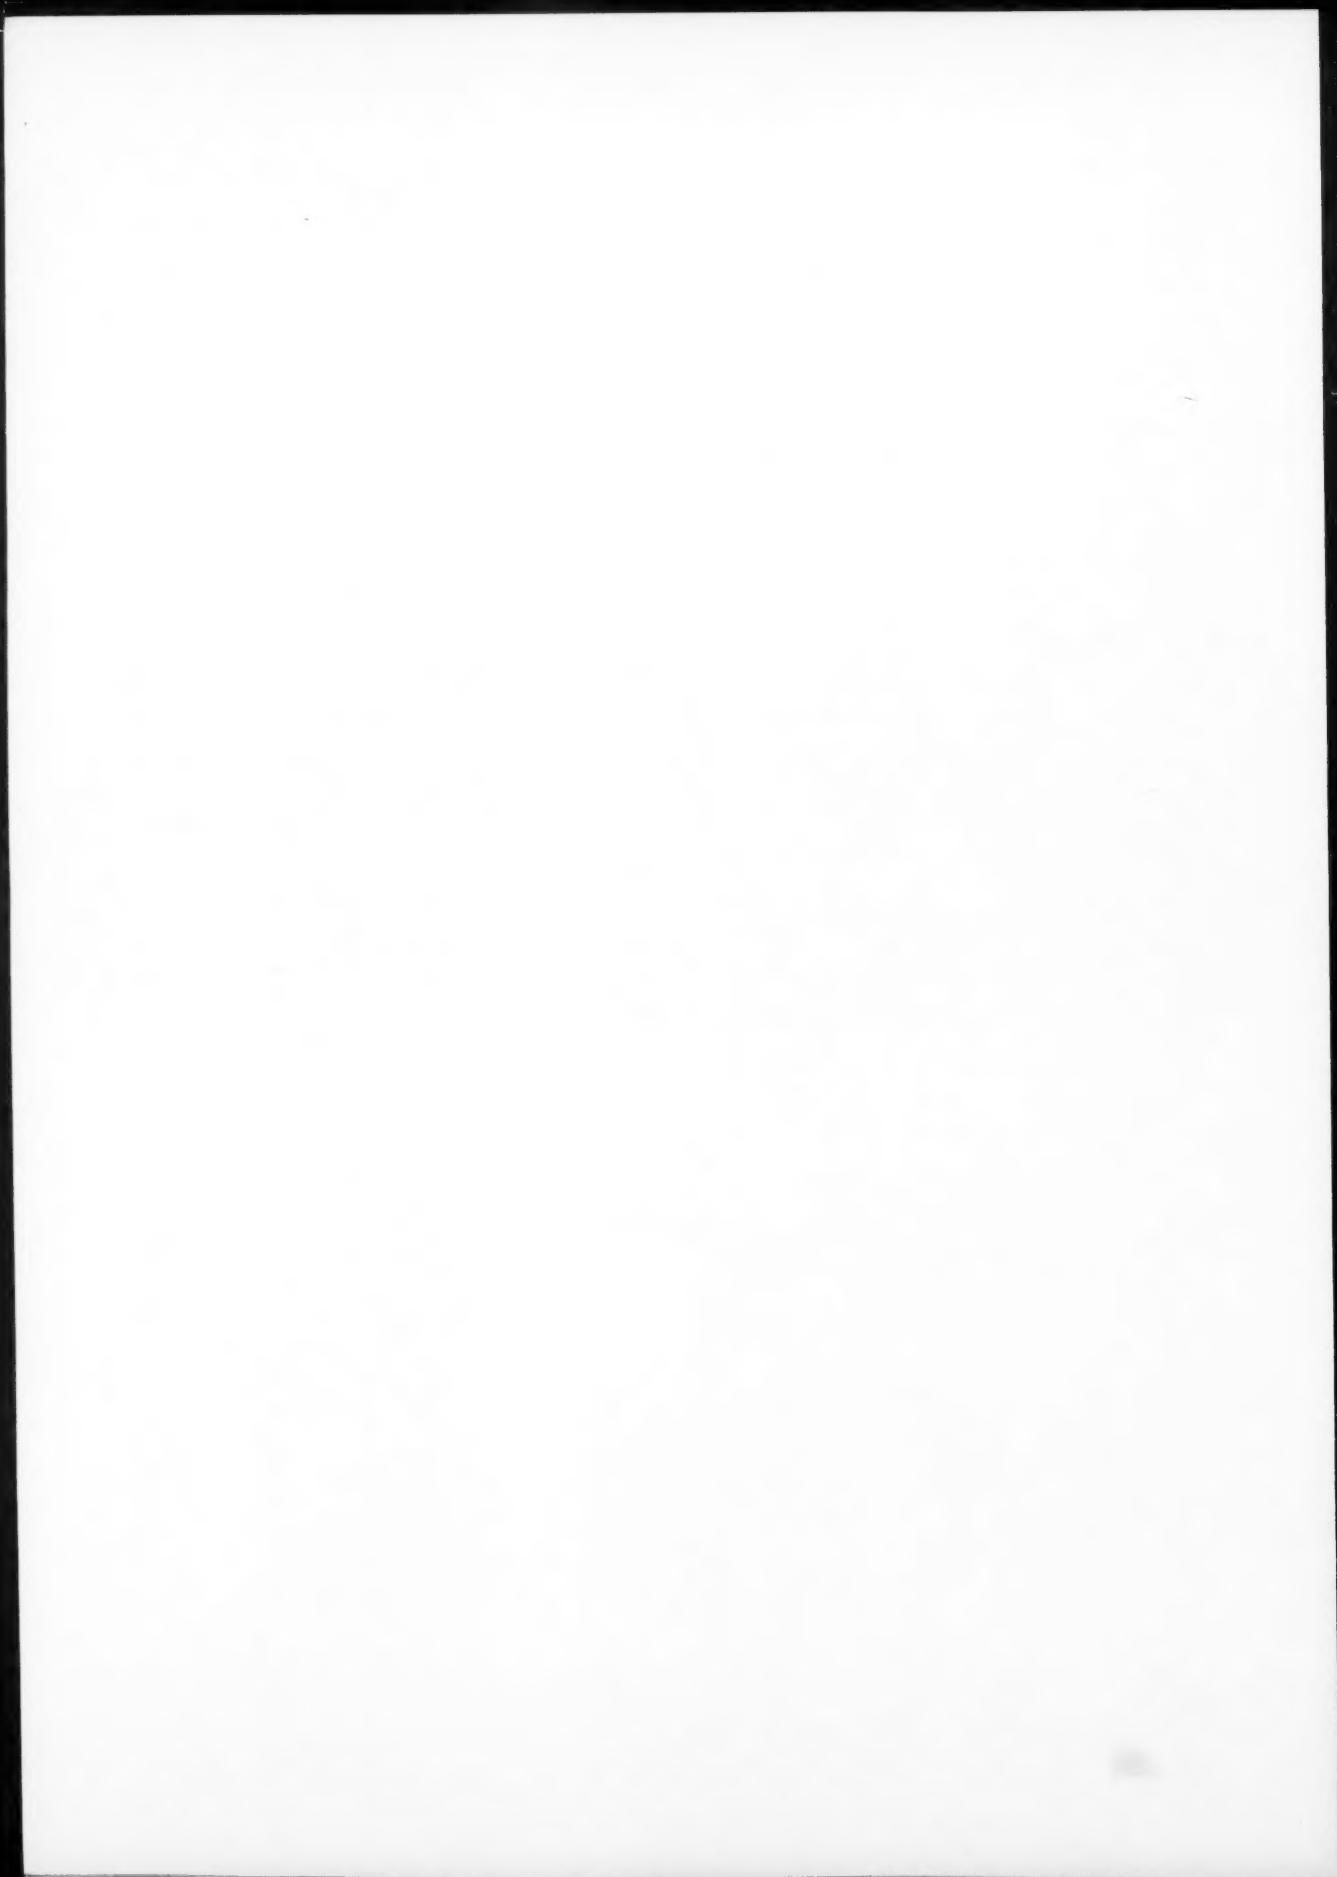

Level the buffer wall: Fair channel assignment in wireless sensor networks 1370

**Zero estimator**

A fast zero estimation scheme for RFID systems 1318

**ZigBee**

The room shortage problem of tree-based ZigBee/IEEE 802.15.4 wireless networks 454
